HAND HYGIENE

New Skinman® Foam

Gentle and Effective Foaming Hand Sanitiser

ECOLAB®
Everywhere It Matters.™

INTRODUCING NEW **Skinman Foam**

Gentle and Effective Foaming Hand Sanitiser

New from Ecolab, Skinman Foam has been developed to be kind to users' hands but highly effective against the pathogens that cause HCAIs. Its unique formulation of effective ingredients provides excellent protection, is non-sticky and easy to apply.

SOFT ON SKIN

Skinman Foam's unique formulation combines five skin friendly ingredients, keeping hands soft and healthy, whilst protected against HCAIs.

VITAMIN E

PROTECTION AGAINST FREE RADICALS

With Vitamin E, an antioxidant that protects the skin at a cellular level and enhances its barrier function.

NIACINAMIDE

STRENGTHENS & BOOSTS ELASTICITY

Niacinamide encourages the production of collagen and ceramides, which help to keep the skin strong and supple, preventing trans-epidermal water loss.

GLYCERIN

HYDRATES & MOISTURISES

Nourishing Glycerin hydrates dry skin by absorbing ambient water from the air, sealing it into the skin cells.

PEG 10 DIMENTHICONE

PROTECTS & LOCKS IN MOISTURE

Conditioning PEG 10 Dimethicone seals in moisture for long-lasting hydration.

ETHLYHEXLY GLYCERIN

BOOSTS MOISTURISERS

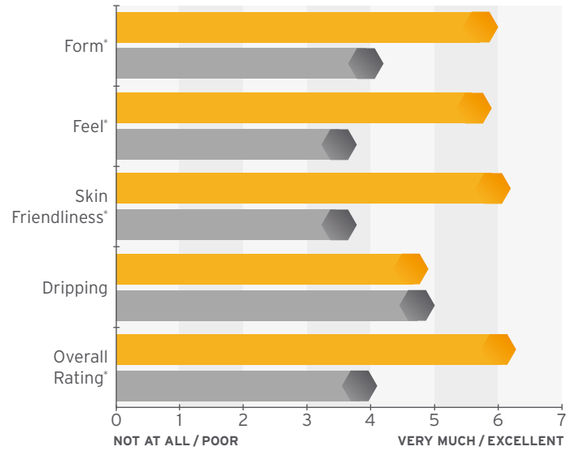
Emollient EthylHexylGlycerin enhances the moisturising powers of glycerin and improves the feel of the product on the skin.

LOVED BY USERS

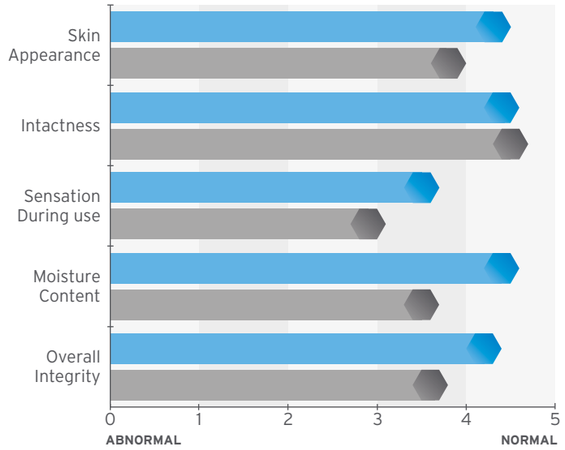
In user trials† Skinman Foam consistently outperformed a leading foam product across a range of acceptability and tolerability criteria:

A Leading Foam Product — Skinman® Foam

PRODUCT ACCEPTABILITY BY PARTICIPANT (Evaluation 1-7)



SKIN TOLERABILITY BY PARTICIPANT (Evaluation 1-5)



*Statistically different from the leading foam product

HARD ON PATHOGENS

With highly effective active ingredients, Skinman Foam is fully virucidal and has excellent microbiocidal efficacy according to the latest EN test standards.

TEST TYPE	TESTING STANDARD	CONTACT TIME
Hygienic Hand Rub*	According to EN 1500: 2013	30 secs
Norovirus	According to EN 14476: 2015	30 secs
Full Virucidal Efficacy	According to EN 14476: 2015	90 secs
Bactericidal Efficacy	According to EN 13727: 2015	15 secs
Yeasticidal Efficacy	According to EN 13624: 2013	15 secs
Surgical Hand Disinfection*	According to EN 12791: 2016	2 mins

*Keeping hands wet for the entire contact time.

HAND IN HAND PROGRAMME

WORKING TOGETHER **For Better Hand Hygiene**

Ecolab have developed a systematic approach to help Infection Prevention teams to improve standards of hand hygiene in healthcare, combining innovation and technological advancements across four key areas:

- Products & Regime
- Dispensers & Signage
- Monitoring & Evaluation
- Training & Improvement

With dedicated service and support from our trained Healthcare Managers, the Hand in Hand Programme provides the products, equipment, resources and expertise required to realise long-term improvement in your health environment.

† Trials conducted with 61 participants at a UK hospital, using a Likert scaling system to rate skin tolerability and acceptability.
