

compact  
mask

Protection against Gas, Vapour and Dust

**MOLDEX**

Com•pact: "Occupying little space compared with others of its type"

## compact mask

Designed for comfort  
and simplicity

The new CompactMask with its integrated filter elements offers respiratory protection in a shape never seen before. The dimensions have been reduced to a minimum to offer the smallest possible profile.

The CompactMask is very lightweight, easy to use and offers unrestricted freedom of movement. The low profile design offers excellent field of vision and can be worn with other safety equipment like face shields, welding helmets or goggles.

Comfort meets simplicity

**1. Open the bag**

The mask is ready to use!

**2. Putting on**

Easy adjustment of head straps.

**3. Fit check**

So simple - push the valve cover and exhale.

No air escapes? - the mask fits safely.

**4. There you go**

Work comfortably with the maintenance free CompactMask.

That's how simple professional respiratory protection can be

Excellent field of vision allows you to work freely

Less mask,  
more view

The horizontally shaped integrated filters give an exceptionally wide field of vision.

FlexFit - comfortable fit

Secure fit for different  
face shapes and sizes

The innovative FlexFit in the nose area provides a secure and comfortable fit. The mask body is smooth and gentle on the skin and automatically adjusts to different face shapes and their movements.

And there is another advantage:  
The FlexFit provides one size fits all

# compact mask

Fresh air with every breath

Easy breathing,  
cool comfort

The Moldex Pleated Filter Technology has more than double the filter surface. This reduces breathing resistance significantly plus it increases the service life of the particulate filters. No additional pre-filters are necessary.

Exhalation valve has large vents to optimise the air stream and keeps the user cool and fresh.
