Ease of Use

Manage all flood and water damage events in any situation at a moments notice. Simply carry to the required location, take out of the bag, soak up the spilled water or use the flood-water to energise the bag and then stack if required. No tools needed, will work in doorways of all sizes, you can build walls up to a metre high, you can soak up water and divert water flow.

Compact

Store anywhere as five vacuum packed bags weigh just over 2 kilograms and is only centimetres thin. Keep packs in the laundry or kitchen cupboards, storerooms or even behind the seat of any vehicles.

Super absorbent

The only option for flash flooding and unplanned water damage as a wall of Floodsax can be deployed in minutes. A pack of 5 commercial bags will absorb over 100 litres of water or all the water from a washing machine.

Lightweight

Empowers everyone including the elderly, disabled and those not capable of managing traditional sandbags to protect their home or business from storms, floods and accidental water damage.

Deployment

At the scene of the flood, take the FloodSax out of their packaging and soak in water, which could be from the sink, hosepipe, watering can or even the flood water itself and the bag will miraculously expand by absorbing water to become taut and creates a barrier in 3 minutes.

Self Contained

FloodSax provide a clean, 'sanitised' solution for water accidents, minimise insurance claims for water damage, enable businesses to keep trading while still managing a water event. Ideal for shopping centres, hospitals, nursing homes and childcare centres. Once the water is in the bag it stays there, suspended inside the bag. After soaking up to 22 litres of water from a spill you can carry a fully energised FloodSax through the most delicate environment without water leaking out.

Environmentally Friendly

Take care of the planet, as FloodSax are fully biodegradable.

Made in the UK

Reliable and dependable, FloodSax have been widely used in the UK for many years and are endorsed by Zurich Insurance.

5 Year Shelf Life

Have peace of mind you are prepared for any water event for up to 5 years
