Data Sheet

The **NEW Flat-pack Construction Stand** range is a clever and compact solution for mobile fire safety. With a number of stands designed to be installed in three simple steps, this innovative range saves valuable time, energy and costs when transporting or storing fire safety equipment.

FLAT-PACK CONSTRUCTION STAND RANGE

We know fire safety equipment and trolleys can be heavy and bulky to transport and store compliantly. This revolutionary new range comes in a nifty compact design for shipping or storing. To install, simply slot together three parts in three easy steps.

CON-STD-01 Flat-pack Construction Fire Point Stand

The first to launch in the range, the Flat-pack Construction Fire Point stand is a clever, compact solution for mobile fire safety. Featuring space for x 4 fire extinguishers and large backboard for signage and mounting of the NEW Commander Single Site Alarm, as well as pre-drilled holes for optional Commander Double Cabinet installation.

CON-STD-02 Flat-pack Compact Double Trolley

A new addition to the range and designed to accommodate two fire extinguishers up to 9kg in size, landscape fire extinguisher D signs, as well as a site alarm and a fire bucket, the Flat-pack Compact Double Trolley features the same simple three step assembly.

NEW Bundles now available

In addition to just the stand, there are a number of Flat-pack Stand Bundles now available that include a variety of fire extinguishers and ancillary products. Search bundles on the CheckFire website to view the range.
