Finally: protective eyewear that fits with masks

With Moldex ADAPT, there is finally protective eyewear specifically designed to be combined with respiratory masks. The unique lens design and the additional sealing lip that adapts to the face enable a significantly lower profile than conventional safety eyewear. This results in more space to fit a mask and the elimination of fogged up lenses due to combined fit.

Fits perfectly with all types of face masks

The perfect combination to offer full protection, comfort and the removal of fogged lenses.

Better protected – all around

Sealing lip and close-fitting lens with UV filter¹ for maximum protection.

Everything in sight

Highest level of optical clarity, wide field of vision, state-of-the-art anti-fog² and antiscratch coatings.

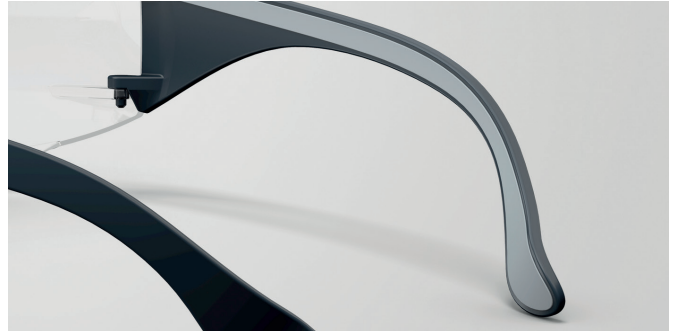

Lightweight

Light as a feather at 21 grams offering robust protection all day.

High wearing comfort

Snug, flexible sealing lip replaces classic nose pads.

Soft dual component design

ADAPT 2K with rubberised side arms for an extremely comfortable, non-slip fit.

Flexible side arms

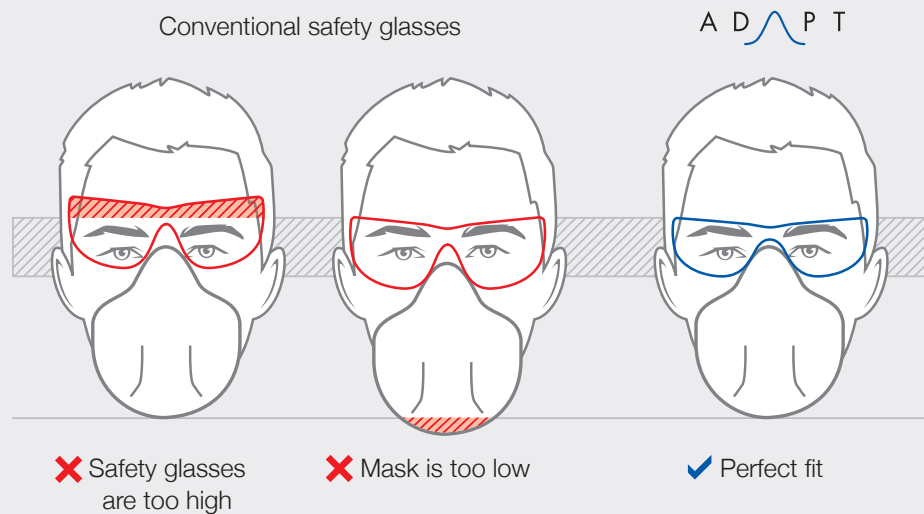

The side arms adapt to the shape of the head for a secure, comfortable fit.

Award winning design

ADAPT eyewear has won the prestigious German Design Award.

How ADAPT works

ADAPT 2K (1400₀₁): with rubberised dual component side arms and premium anti-fog and anti-scratch coating

ADAPT 1K (1410₀₁): with single component side arms and basic anti-fog and anti-scratch coating

EN 166:2001

Our products and packaging are 100% PVC-free
