

Product Specifications

HypaCover Self Seal Finger Dressing

- **Low-Adherent Sterile Dressing Pad with Elasticated Bandage** – Doesn't stick to the wound, reducing trauma and discomfort during removal while adapting comfortably to different finger sizes.
- **Provides Protection and Cushioning for Finger Wounds** – Helps to shield the injury from dirt and bacteria while also cushioning it.
- **Self-Sealing Adhesive Strip** – No clips, pins or tapes needed to secure the dressing in place.
- **Pack Sizes** – Available individually or in packs of 12 bandages.
- **Dimensions:** 3.5cm x 3.5cm

The **HypaCover Self Seal Finger Dressing** is designed for the fast, effective treatment of finger and thumb injuries, helping to protect wounds, control bleeding and stay securely in place, even during movement. The low-adherent sterile dressing provides excellent protection and cushioning for wounds on fingers and thumbs. Its self-sealing design allows for quick one-handed application without the need for clips or tape, making it ideal for emergency situations or lone working. The flexible, stretchable bandage conforms comfortably to all finger sizes, ensuring a secure fit that prevents slipping during use. Available individually or in packs of 12, it's a practical addition to any first aid kit.

Key Benefits

- **Protects and cushions wounds** – the sterile low-adherent pad helps shield the injury from dirt and bacteria while also cushioning it.
- **Designed for finger and thumb injuries** – specifically created to protect finger and thumb injuries which are more exposed and prone to knocks.
- **Low-adherent** – designed to stay securely in place while allowing gentle, easy removal with minimal trauma to the wound.
- **Easy to apply** – the self-sealing adhesive strip means no clips, pins or tapes are needed.
- **Elasticated, flexible fit** – the elastic bandage is soft and stretchable, so it adapts to different finger sizes, helping to keep the dressing secure even on moving joints.
- **Hygienic and sterile** – individually wrapped and sterile, reducing the risk of infection and making it suitable for first aid kits at home or work.
- **Designed for emergency/self-care scenarios** – it can be applied one-handed, so is particularly useful if you're injured alone or need to act fast.

Why Choose HypaCover? With over 60 years of expertise behind it, the Hypa Range offers business-ready products that go beyond basic compliance. Designed for superior quality, comfort, and usability, Hypa helps your organisation stay safe, efficient, and fully compliant. Our efficient HypaCover dressings and supplies help control bleeding while keeping the surrounding area clean and protecting the wound as it heals. The range includes cotton buds, dressing retention products, eye pads and sterile wipes, making these products an essential component of any first aid kit.
